Precautions for model No. selection

*1 : Supporting hole is available custom made for ø125 to 160 only. Contact CKD for details about dimensions.
*2 : Refer to page 648 for the min. stroke with switch.
*3 : When selecting TA or TB as mounting, the number of switches is limited to "H" (1 on head side) for TA and TD, and "R" (1 on rod side) for TB.
*4 : The instantaneous max. temperature is the temperature when sparks, cutting chips, etc., instantaneously contact the bellows.
*5 : Refer to page 651 for the cushion needle position indication.

Applications

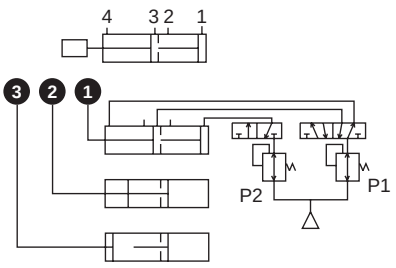
Pressure setting: P2 > P1
- ● 1st stage push
  Keeping port 4 pressurized, pressurize port 1.
- ● 2nd stage push
  Keeping port 1 pressurized, pressurize port 3.



P2 = P1 is allowed depending on the load direction.When using a single acting cylinder with free fall load, ports 2 and 4 in the upper figure and ports 2 and 3 in the lower figure are breathing holes.
Cushion performance will be better when all ports are piped even if piping them is not necessary (port 2 in this case).

Precautions for model No. selection

*1 : Supporting hole is available custom made for ø125 to 160 only. Contact CKD for details about dimensions.
*2 : Refer to page 662 for the min. stroke with switch.
*3 : When selecting TA or TB as mounting, the number of switches is limited to "H" (1 on head side) for TA, and "R" (1 on rod side) for TB.
*4 : The instantaneous max. temperature is the temperature when sparks, cutting chips, etc., instantaneously contact the bellows.
*5 : Check the figures below for the cushion needle position indication.
*6 : "I" and "Y" cannot be selected together.
*7 : Refer to page 667 for details.
